

# SGG 17: Ethical Use of Technology for Social Benefit

Harnessing Innovation  
Responsibly for Equity and  
Inclusion (Agenda 2074)

# Executive Summary: From Risk to Equity

## The Context

Technology is the 21st century's most powerful force, yet its potential is shadowed by risks like privacy violations, algorithmic bias, and digital exclusion.

## The Goal

To establish a global framework where technology serves as an instrument of equity rather than exploitation.

## The Mechanism

Alignment with SDGs 9 & 16, governed by strict ethical standards and oversight.

## The Vision

A future where progress is measured not just by efficiency, but by fairness and inclusivity.

# Strategic Rationale: Why Ethical Governance is a Structural Necessity

Technology is no longer a peripheral enabler; it is the backbone of modern governance and commerce. Unchecked application amplifies inequality and erodes trust.

## 1. Access as a Right

Tech shapes access to health, education, and finance. Without safeguards, these systems exclude vulnerable populations.

## 2. The AI Dilemma

The rise of AI and data-driven decisions introduces algorithmic discrimination and opaque governance.

## 3. Humanity vs. Profit

The tension between commercial imperatives (efficiency/monetization) and human dignity (well-being/autonomy).

# Goal Statement & Definition

Goal: To ensure that technological innovation is governed by ethical principles that prioritize social benefit, inclusivity, and human dignity, creating systems that advance equity rather than perpetuate inequality.

## Definition

Development and deployment that upholds transparency, accountability, and fairness.

## Key Insight

"Technology is not neutral; its impact depends on the values embedded in its design."

# Illustrative Dimensions of Ethical Technology Use

01

Data  
Privacy

Safeguards  
against misuse.

02

Algorithmic  
Fairness

Eliminating bias  
in AI.

03

Digital  
Inclusion

Reducing the  
digital divide.

04

Environmental  
Responsibility

Minimizing  
ecological  
impact.

05

Human-Centric  
Design

Prioritizing user  
well-being.

# Advocacy Objectives: Moving from Compliance to Moral Imperative

# Implementation Pathways (Non-Financial)

A dynamic process requiring continuous adaptation.

# Institutional Anchoring: The Governance Structure

**Stakeholders**

Government  
(Legislation)

Private Sector  
(Strategy)

Civil Society  
(Monitoring)

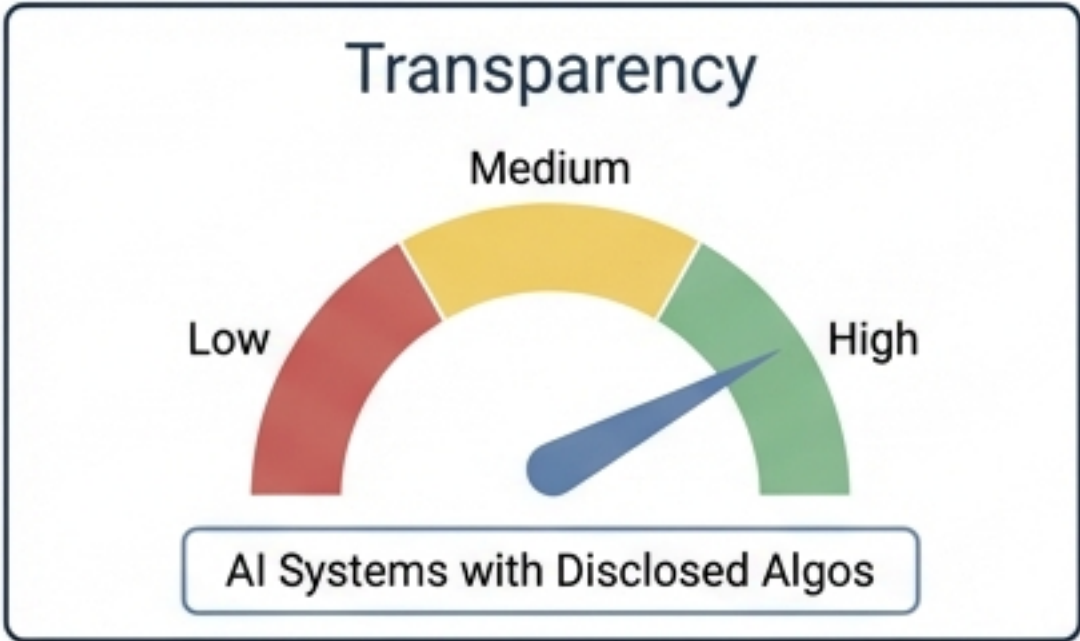

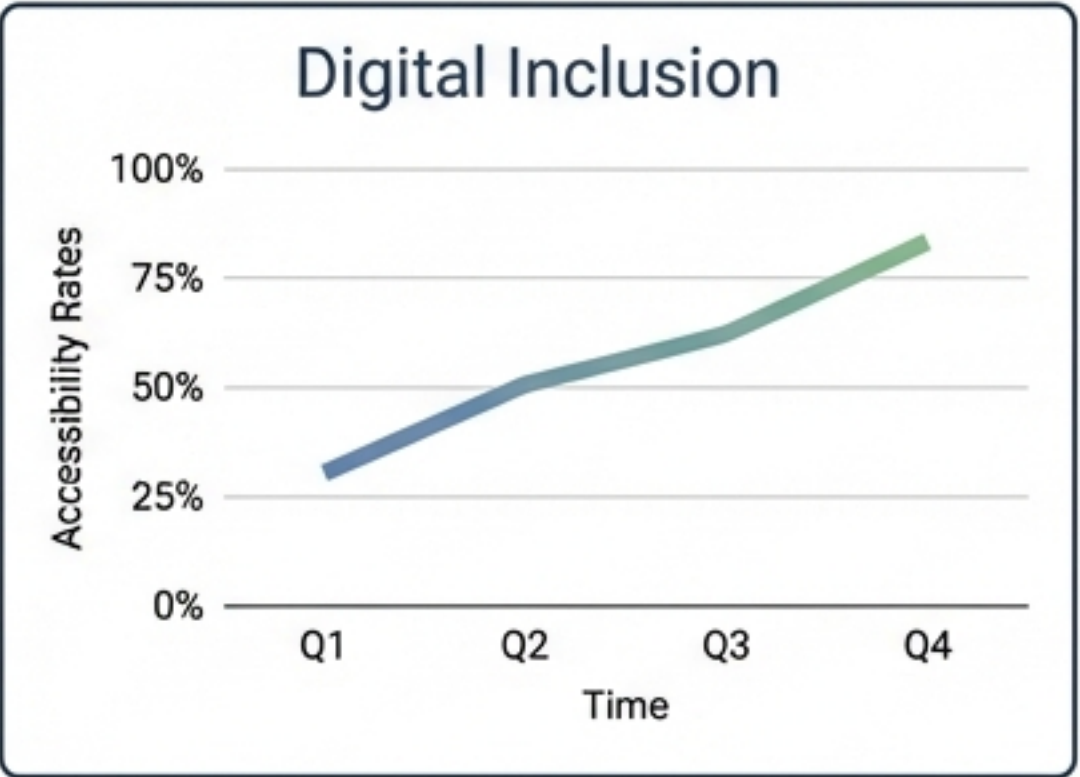

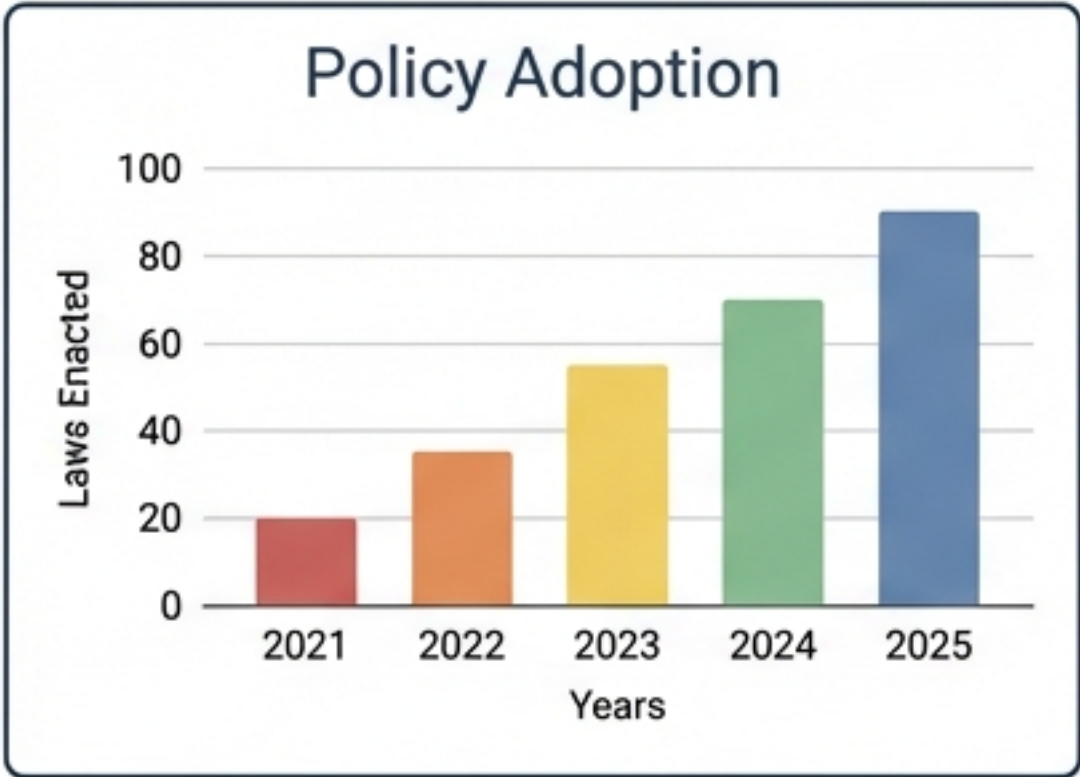

# Compliance & Governance Principles

# Monitoring & Advocacy Metrics

# Risks & Mitigation Strategy

## The Risk

Regulatory Gaps

Algorithmic Bias

Digital Divide

Cybersecurity

## The Shield

Adaptive Review Models

Mandatory Audits

Infrastructure Investment

Strengthened Protocols

## SGG 1: Access to Services

Tech ensures equitable health/finance.

## SGG 4: Education

Ethical platforms expand learning.

## SGG 13: Vulnerable Populations

Safeguards from exclusion.

## SGG 16: Civic Engagement

Secure participatory governance.

**SGG 17 transforms tech from a barrier into a bridge.**

“Technology must serve humanity,  
not dominate it.”

Embed responsibility. Secure a future where innovation and equity coexist.
