

Constitutional Blueprint of the Agenda 2074 Secretariat

The 50-Year Custodial Architecture for the Social Global Goals

A 50-year custodial architecture safeguarding the social equity canon

The Agenda 2074 Secretariat is established as a permanent, neutral, and long-horizon administrative organ under the Global Social Equity Alliance (GSEA). Its sole mandate is to safeguard the integrity, continuity, and universal applicability of the 17 Social Global Goals (SGGs) until 2074.

Strict separation of powers preserves systemic legitimacy and due process

To preserve trust across jurisdictions, the Secretariat operates within an impermeable constitutional boundary, entirely divorced from operational implementation and ethical adjudication.

Internal organs engineered for institutional coherence

The Secretariat is driven by specialised internal machinery designed to maintain the fidelity of the SGG canon and enforce strict treasury compliance over five decades.

The prime directive is transparency without exposure

System-level transparency must never result in entity-level comparative exposure. The Secretariat administers functions in absolute fidelity to a system ethic of dignity, autonomy, and equity.

Dignity
Eradication of coercive reporting.

Autonomy
Absolute requirement for revocable, consent-led disclosure.

Equity
Strict adherence to the doctrine of non-comparativity (no rankings, no league tables).

The consent ledger sanitizes data before system-level reporting

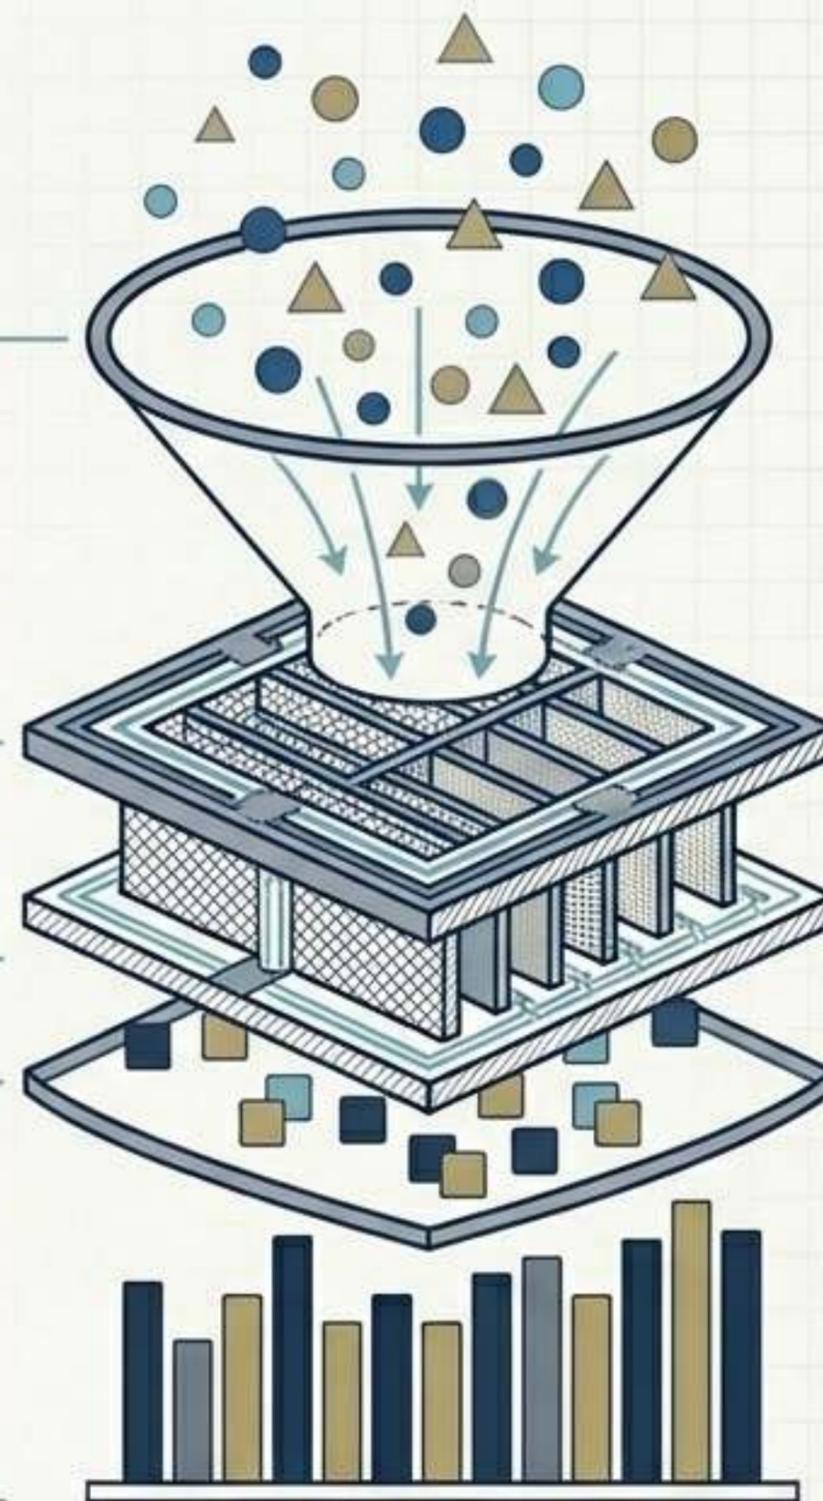

The Digital Trust Technical Board enforces an architecture that prevents public-by-default disclosures. Participant inputs are scrubbed of identifying markers to produce actionable system insights.

The constitutional levy architecture

The composition of the funding base is strictly defined to ensure proportional contribution across the governance universe. These levies take absolute precedence over discretionary or optional allocations.

Treasury integrity and the absolute ring-fencing of funds

The Secretariat Treasury Unit (STU) enforces dual-signature controls and expenditure limits. GSIA maintains oversight of the routing and ring-fencing to ensure systemic integrity without directing Secretariat policy.

The stable center of the Creativa governance universe

The Agenda 2074 Secretariat is an impeccably engineered constitutional architecture. By securing its mandate, protecting its data, and ring-fencing its fuel, it stands ready to safeguard global social equity for the next five decades.
