EUSL Membership Model & Digital Infrastructure Framework

Institutional Positioning, Economic Substance, and Legal Alignment

CREATED BY
EUSL AB

Care to Change the World

**EUSL CONSTITUTES
INSTITUTIONAL
AFFILIATION WITHIN
A COLLECTIVELY
GOVERNED
ECOSYSTEM, RATHER
THAN PARTICIPATION
IN A COMMERCIAL
SERVICE
ARRANGEMENT.**

COLLECTIVE GOVERNANCE

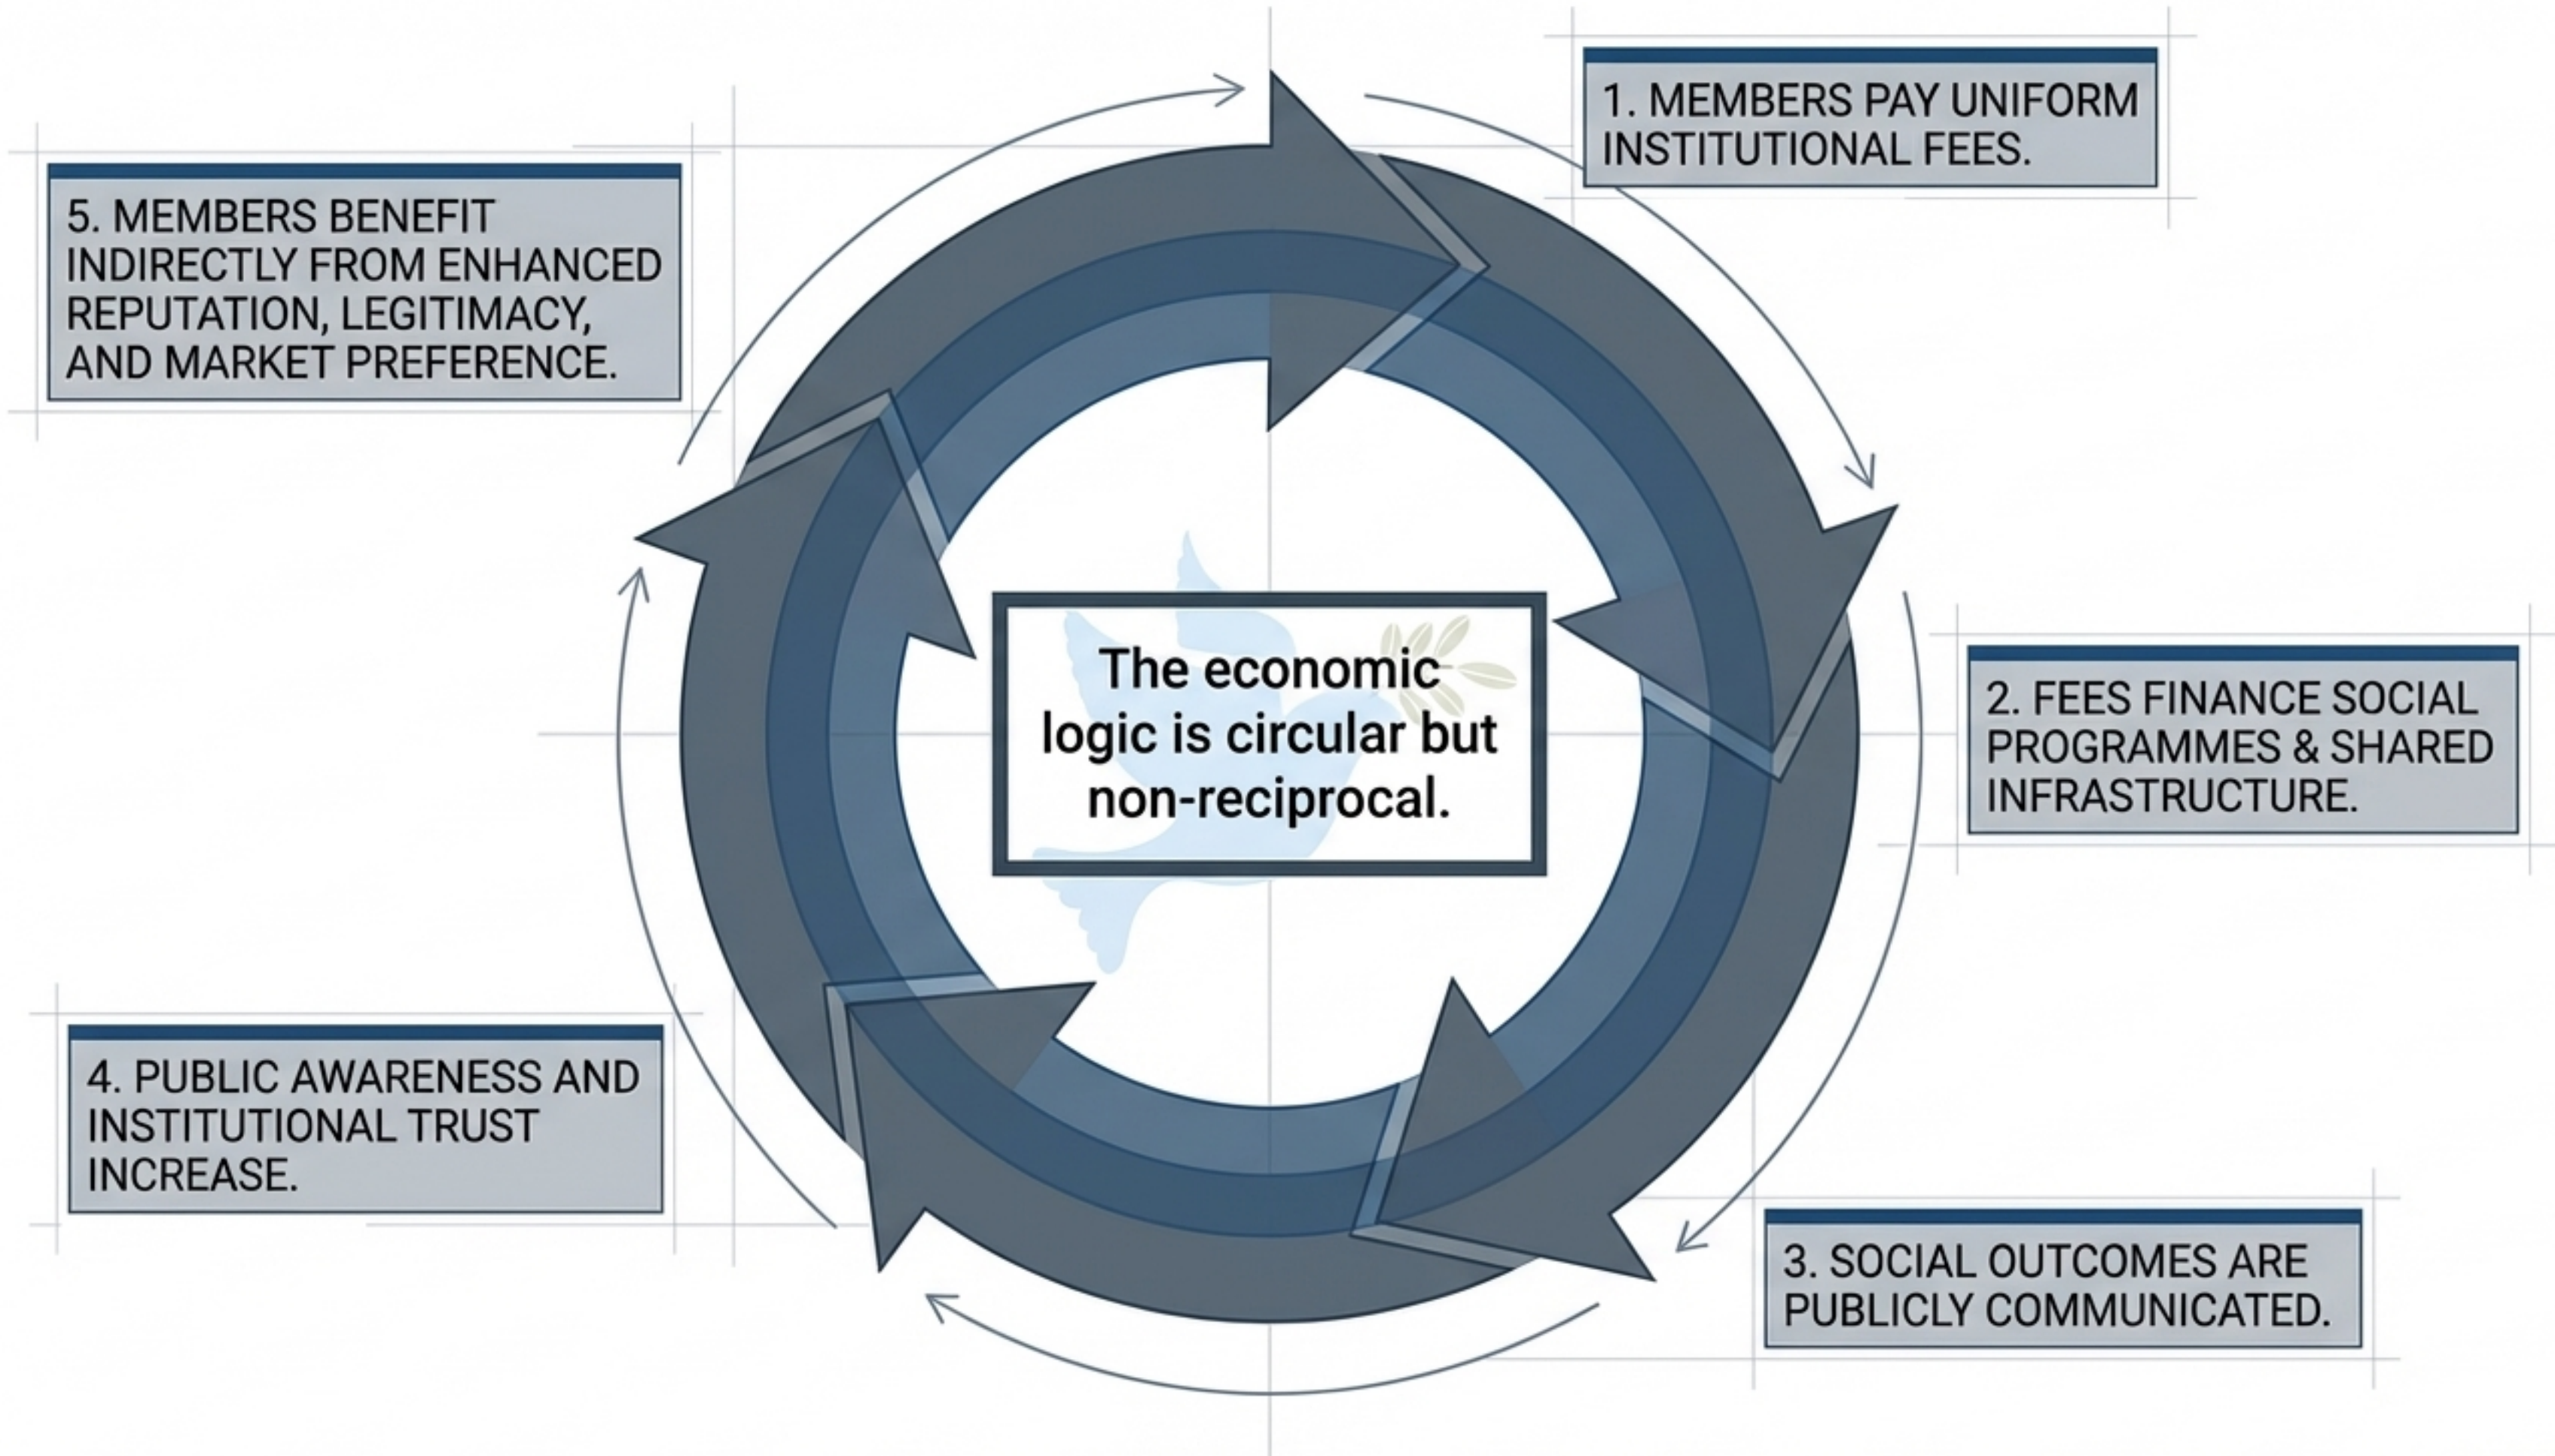

Membership grants rights of participation and influence, not claims to individual performance outcomes.

SUBORDINATION OF TOOLS

Digital resources are non-exclusive, non-guaranteed enabling tools, entirely subordinate to the membership relationship.

SEPARATION OF SERVICES

Individualized capabilities (Add-Ons) are strictly separated from institutional membership to ensure legal and auditable boundaries.

DEFINING THE EUSL ECOSYSTEM

THE IDENTITY MATRIX

EUSL IS	EUSL IS NOT
Membership-based social and economic ecosystem.	Commercial IT or media service provider.
Collective legitimacy, coordination, and impact.	Sale of digital tools or licenses.
Membership fees funding organizational purpose.	Fees charged per delivered service.
Shared internal infrastructure.	Individually contracted cloud services.

UNIFORM MEMBERSHIP FEE

Purpose-first, not benefit-first.
No individual entitlement to specific outcomes.

Membership fees are never calculated by reference to the market value of any digital tool, storage capacity, or software license.

KEY CHARACTERISTICS OF THE INFRASTRUCTURE

- **Role:** Enables a distributed, multi-jurisdictional organization to function.
- **Comparability:** Equivalent to shared meeting rooms or administrative systems in a traditional organization.
- **Technology Posture:** Intentionally open-source, modular, community-driven, and technologically neutral.
- **Access:** Authenticated via EUSL-controlled identity, existing solely as a function of institutional belonging.

STRUCTURALLY DISTINCT FROM COMMERCIAL SERVICE PROVISION.

EUSL DIGITAL RESOURCES

COMMERCIAL DIGITAL SERVICES

Membership affiliation

Individual contract

Access as participant

Entitlement as customer

None

Explicit pricing

Collective and limited

Customer-specific

Organizational discretion

Contractual obligation

Resources are intentionally interchangeable and do not substitute a member's own commercial IT systems.

THE “AS-IS” OPERATIONAL REALITY

Availability: Reasonable efforts, no uptime guarantees. Provided strictly “as-is” and “as-available”.

Performance: No warranties regarding scalability or fitness for any particular mission-critical commercial purpose.

Continuity: Subject to change. No platform is guaranteed to persist; EUSL relies on modular, replaceable technologies.

PARTICIPATORY GOVERNANCE DRIVES PLATFORM EVOLUTION.

Members do not act as consumers demanding service optimization; they act as participants shaping a living organizational ecosystem. Decisions avoid unilateral contractual dependency.

THE ECONOMIC SUBSTANCE FIREWALL

TRACK A

THE MEMBERSHIP FEE

Nature: Collective contribution, uniform availability, legally based on affiliation.

Coverage: Shared organizational baseline.

FIREWALL

TRACK B

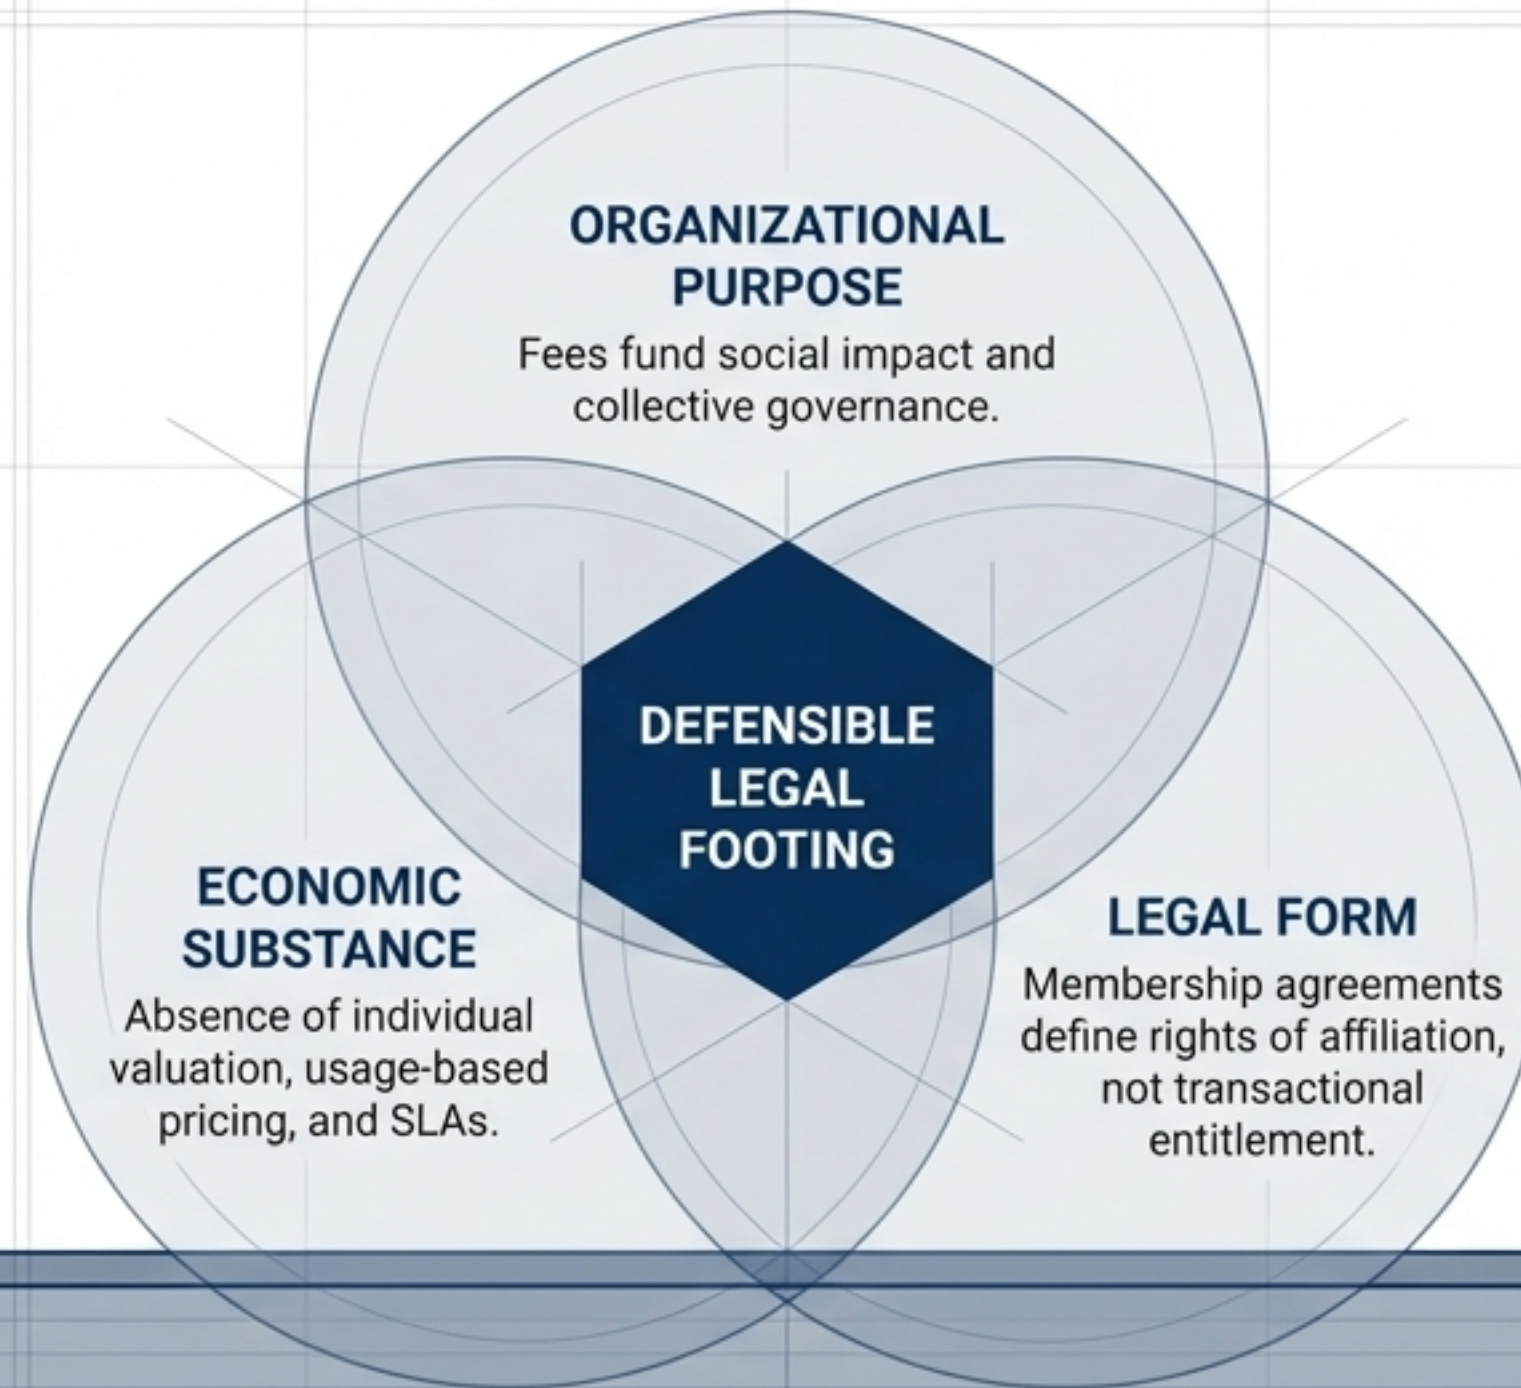

OPTIONAL ADD-ON SERVICES

Nature: Individual consideration, explicit pricing, defined by separate agreement.

Coverage: Additional storage, bespoke integrations, dedicated support.

**ADD-ONS NEVER GRANT ENHANCED VOTING
POWER OR ORGANIZATIONAL INFLUENCE.**

ALIGNING PURPOSE, ECONOMIC SUBSTANCE, AND LEGAL FORM

The absence of direct consideration between the fee paid and specific digital resources accessed decisively protects the membership fee from being classified as a taxable supply of services.

PROACTIVE RISK ASSESSMENT AND DEFENSIVE POSITIONING.

RISK:

Service Recharacterization

MITIGATION:

Strict absence of Service Level Agreements (SLAs), performance guarantees, or individual entitlements.

RISK:

Pricing Scrutiny

MITIGATION:

Zero itemization or market valuation of digital resources within the membership fee.

RISK:

Usage-Based Inference

MITIGATION:

No link between fee scales and individual technical consumption.

RISK:

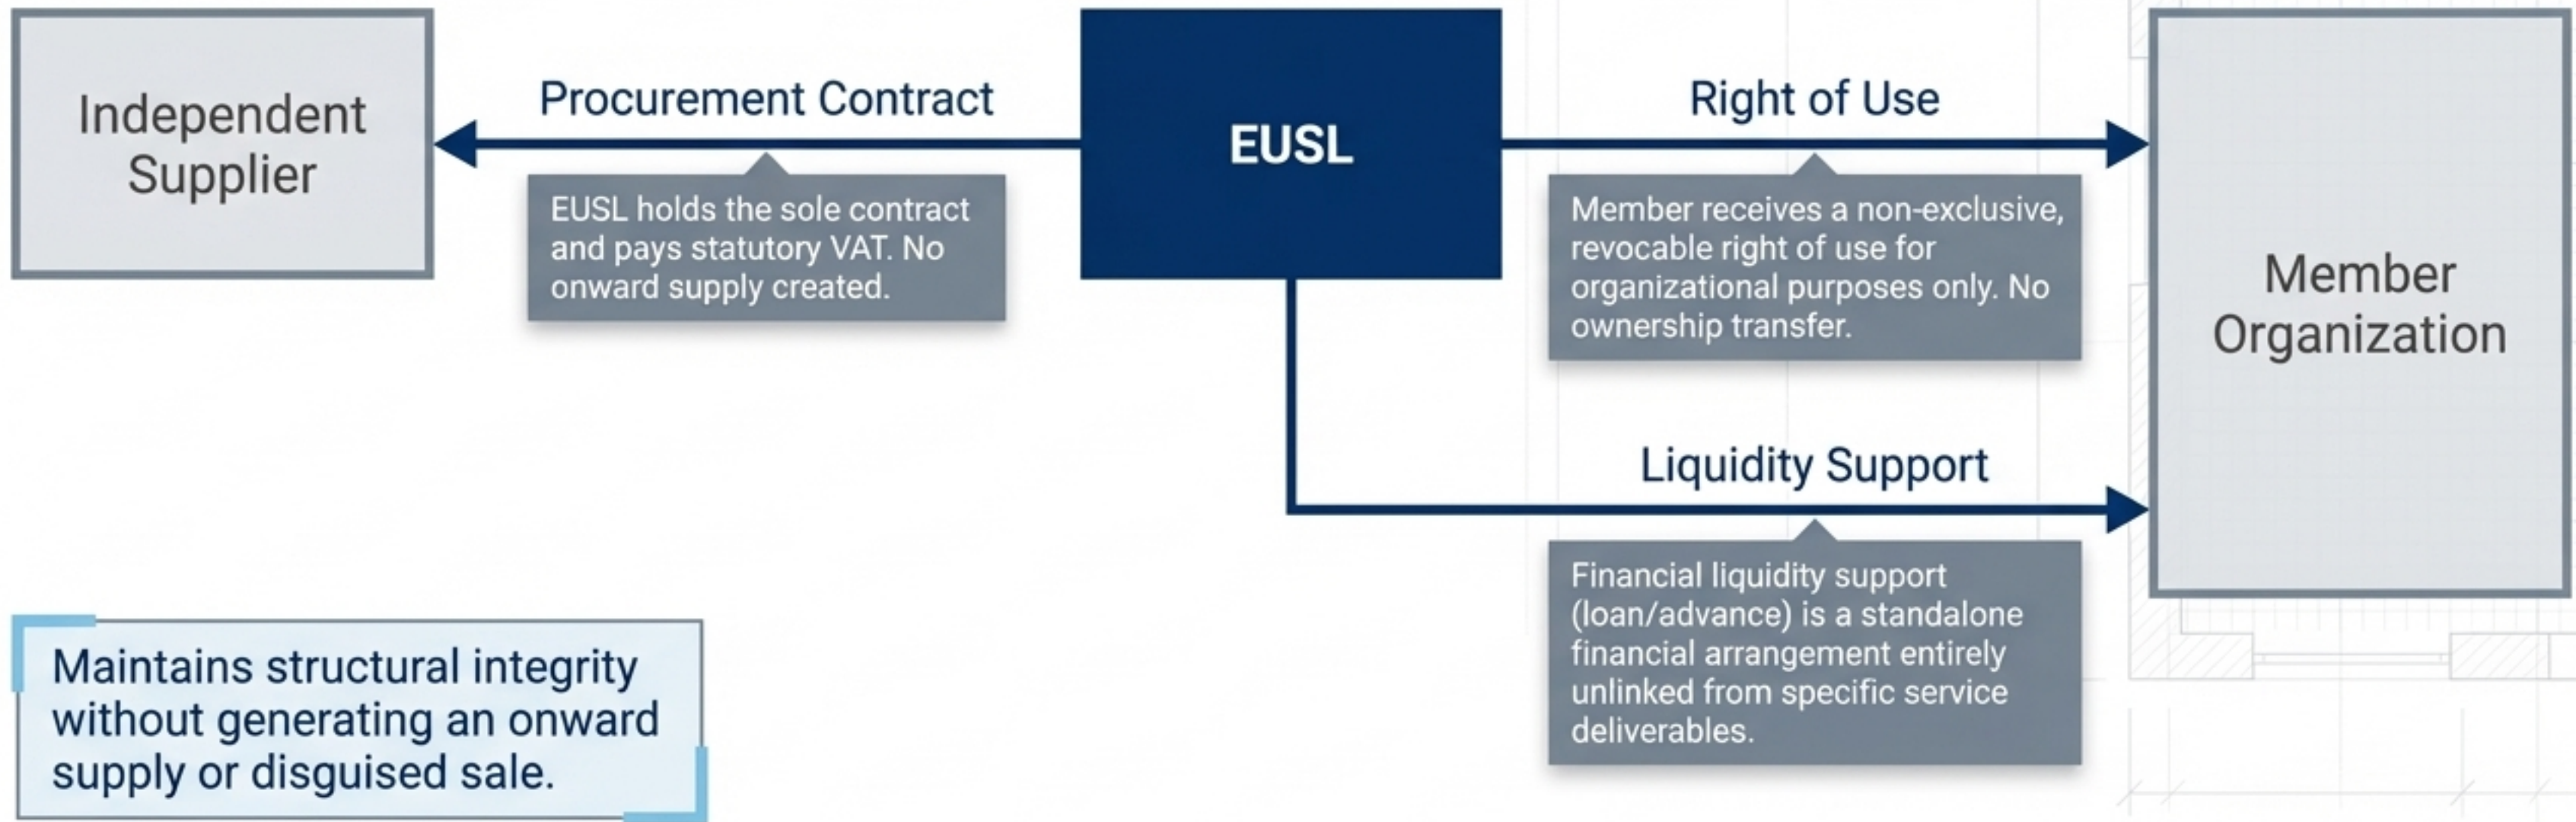

Operational Ambiguity

MITIGATION:

Rigid internal separation of membership functions and optional add-ons in accounting and contracting.

SAFE PROCUREMENT AND LIQUIDITY SUPPORT (CASE STUDY)

ORGANIZATIONAL INTEGRITY AND COMPLIANCE COMMITMENTS

<p>TRANSPARENCY</p> <p>Maintaining clear documentation of purpose, structure, and collective funding.</p>	<p>SUBSTANCE OVER FORM</p> <p>Ensuring continuous alignment between stated intent and real economic activity.</p>
<p>CONSISTENCY</p> <p>Uniform application across all agreements, internal operations, and public communications.</p>	<p>SEPARABILITY</p> <p>Enforcing the operational distinction between membership affiliation and commercial services.</p>

By maintaining these boundaries, EUSL preserves its legal foundation and ensures its credibility as a scalable, long-term actor in the social economy.
